Work experience:	<u>12.2021 - 10.2022, EPAM Anywhere</u> Lead Software Engineer MigVisor — cloud migration assessment product. Main technologies: Angular, TypeScript, Figma, JavaScript, Storybook, Node.js Responsibilities: Leading the team, application architecture, API-contracts composing, UI/UX decisions, mentoring team members. Some of achievements: My team was the only one who did the work by the deadline. We rewrite the legacy application, and I made the new architecture that allows us to unify and make reusable all UI elements, easily add new features and different types of pages, and that is easy to grow up and maintain. I implemented the fully functional backend CRUD-server to host mock-data while the real API was in development.

**Work
experience:**
(continuation)

03.2016 - 12.2021, Luxoft
Frontend technical lead

ESolutions — translations management project.
